8/10/70 Paul, I've been too busy to copy Ferrie complaint and I've heard nothing more from Bud. It is the end of the day and he's said nothing about what I should have ready for a court hearing scheduled for day after tomorrow. Had three "buffs", two with wives, for weekend, and still did some work while they were here. Third of edited-down COUP just mailed back. New title not decided upon. Theirs (The Wrong Plea--James Earl Ray", I reject totally. I favor FRAMEUP: The King/Ray Case....I now have pictures of a clarity I've never seen before and I am even more deeply disturbed about and about the potential of your project with Alverez. I also know about the raw material of what you are working with that I cannot put in writing. Not being a scientist, it may be inappropriate for me to suggest ~~extensive~~ scientific approaches and methods, but I would suggest that the integrity of the raw material might be one. He (you) should be completely satisfied there has been no tampering, where you can see and where you cannot, from what has been printed. I now also have another view than you have indicated any work with. It also is of great clarity. Please accept a friend's caution not to be hasty and to exhaust all possibilities.I am sorry I must be so elliptical, but I must be...You have been silent about yourtrip to Washington and the docs...I've had no Arch, DJ or SS letters since I sent last. Best regards,
